Teamwork Makes It Possible

Services to our partners covers everything from consulting, assessment, design, implementation and support.

Pre-sales

Our teams of accredited industry experts work closely with our partners from the very onset of a project, offering complete pre-sales consultancy and solution design services as well as existing design configuration and review.

Warehousing

With efficient warehouse facilities we ensure that the distribution process is smooth, coherent and the inventory is safe during the whole process.

Logistics

Magnus ensures the seamless movement of products from the warehouse to the customer location. We provide all the required support to ensure the delivery of products without delays.

Training

We arrange regular and customized training sessions on the latest technologies and product developments, in collaboration with our vendor partners.

Marketing

An aggressive marketing team ensures that every brand gets the visibility to their right market. With the effective use of digital channels, we run demand generation campaigns and thereby increasing brand awareness.

D-Link is a globally recognized leader in networking technology, offering a comprehensive range of solutions for both business and home users. Their portfolio includes networking, broadband, wireless, data/voice communications, and converged digital connectivity solutions. With a focus on innovation and quality, D-Link designs products that enable seamless connections, resource access, and communication among consumers and businesses worldwide.
